Subject: Re: VPN install on OpenVZ container inside KVM host
Posted by aslanmax on Wed, 02 Sep 2015 07:23:16 GMT

Hello Mr. Thorsten,
Sorry for late response,
Finally, We successfully built up the VPN tunnel. The trick was open up UDP 500 and 4500 ports
on the Firewall.
 I will most probably turn back again to this Forum with some other things...
Thank you very much.
