Subject: Precreated templates cannot be downloaded
Posted by sidd on Sat, 07 Nov 2015 05:35:24 GMT

Hi,

When i try to download the template from the openvz repo "
download.openvz.org/template/precreated/ubuntu-15.04-x86_64. tar.gz " i get the following error :-

The requested URL /template/precreated/ubuntu-15.04-x86_64.tar.gz was not found on this server.

Apache/2.2.15 (CentOS) Server at download.openvz.org Port 443

Can some one from openvz team look into it.

Regards,

Sid Rele
