Hello!

I try t update kernel but I receive that:

```
[root@vps1 ~]# yum update vzkernel
Loaded plugins: fastestmirror
Setting up Update Process

Resolving Dependencies
--> Running transaction check
---> Package vzkernel.x86_64 0:2.6.32-042stab113.11 will be installed
--> Processing Dependency: kernel-firmware >= 2.6.32-573.8.1.el6 for package:
vzkernel-2.6.32-042stab113.11.x86_64
--> Finished Dependency Resolution
Error: Package: vzkernel-2.6.32-042stab113.11.x86_64 (openvz-kernel-rhel6)
       Requires: kernel-firmware >= 2.6.32-573.8.1.el6
You could try using --skip-broken to work around the problem
You could try running: rpm -Va --nofiles --nodigest
[root@vps1 ~]# w
```

In /etc/yum.repos.d/openvz.repo I added exclude=vzkernel-firmware but the same result.

Any help?

Thank you!
