Subject: Software raid from container, is it possible? Posted by lelik67 on Fri, 05 Feb 2016 13:59:35 GMT

I am trying to evaluate openmediavault (OMV) and installed it as a container on openvz sefrver. I have 4 additional drives on the host, which I passed through to OMV container with vzctl set NNN --devices

I can see them from within the container mount, etc.

But when I tried to assemble the RAID from them with mdadm, I am getting errors. Is it even possible / supported?
