```
insserv: can not symlink(../init.d/vzquota, ../rc0.d/S01vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc1.d/S01vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc2.d/S01vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc3.d/S01vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc4.d/S01vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc5.d/S01vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc6.d/S01vzquota): File exists
```

Can anyone help?

How to fix?????????????????

```
insserv: can not symlink(../init.d/vzquota, ../rc0.d/S17vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc1.d/S17vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc2.d/S17vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc3.d/S17vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc4.d/S17vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc5.d/S17vzquota): File exists
insserv: can not symlink(../init.d/vzquota, ../rc6.d/S17vzquota): File exists
```

I'm getting the same exact errors. Is there a solution to fix this?
