Subject: Re: cannot login after installing XFCE desktop remotely in Fedora 22
Posted by ura_Soul on Mon, 29 Feb 2016 18:48:23 GMT

i have now fixed this by following the advice in this video:
http://openvz.livejournal.com/50063.html?mode=reply
when i disabled network manager in the server installation, i was then able to login via putty or x2go after a reboot.
i think this should be a sticky of some kind!
