Hello,

If i start the virt-Manager, on the first screen it should be a choice of Type (Container or VM).
it is also in the documentation.

But in my installation:

Version 1.3.1 isn't it.

Whats Wrong? There are a new virt-viewer

If i try to create a new connection i only have in Hypervisor = Virtuozzo no choice

I hav installed the free Virt-Manager. When i create a new connection i have lxc,

one's again, i want upload a file 32KB and i run in sure Error with upload.

File Attachment is too big (over allowed limit of 2097152 bytes)

Maximum File Size: 2048KB
