Subject: Undelete files in openvz container Posted by Naxid on Fri, 20 May 2016 12:40:38 GMT

Before around 2.5 hours ago I deleted a very important directory on my openVZ vps.

I have tried:

root@server:/home extundelete /dev/simfs --restore-directory ./ --output-dir /home/restore/

Output:

extundelete: failed to read-only open device "/dev/simfs": Error code 1

How can I solve this issue?
