Folks,

I made a snapshot with the following commands:

```
vzctl snapshot 302 --id 2c6aaac3-c78f-471b-92ba-6a789b06a0bd --skip-suspend --skip-config  
vzctl snapshot-delete 302 --id 2c6aaac3-c78f-471b-92ba-6a789b06a0bd
```

Followed by way of example documentation below:

<https://openvz.org/Ploop/Backup>

But now how do I restore this backup/snapshot?
