i try on centos7

```
yum install -y vzkernel prctl prl-disp-service libprlsdk-python vzstat
systemctl enable prl-disp
systemctl restart prl-disp
systemctl enable vz
systemctl restart vz
systemctl enable ksm
systemctl enable ksmtuned
systemctl enable libvirtd
systemctl restart ksm
systemctl restart ksmtuned
systemctl restart libvirtd
```

reboot

add VEFSTYPE="simfs" to /etc/vz/vz.conf

```
vzctl create 106 --ostemplate=centos-6
```

```
vzctl create 107 --ostemplate=centos-7
```

```
vzctl start 106
```

```
vzctl start 107
```

all fine

to restart container on reboot host-machine need packet libprlsdk-python
this install python sdk lib for /etc/vcmmd.d/vz python-script
