i try to use openvz 7

prl_disp_service is listen port 64000

```
tcp      0      0 0.0.0.0:64000      0.0.0.0:*          LISTEN    1506/prl_disp_servi
```

google say - this port used for parallels managment console, odin automation for cloud and etc

but i not found how config username/password to restrict access for this port

how disable this functional ?
