Hello

i want install bugzilla on a VE, but the installation process stops with followig output:

Fixing permissions for www-data...

<h1>Software error:</h1>

<pre>Can't fix owner of files under /var/lib/bugzilla : Cannot allocate memory at /usr/share/bugzilla/lib/checksetup.pl line 160.

</pre>

<p>

What can i do, to finish the installation successfully?

Regards

Florian
