Hello,

I am running Virtual Machines in OpenVZ 7 and suddenly I hit the problem that my VMs fails to start on Node startup:

```
Jan 04 17:25:39 Node systemd[1]: Starting Virtual Machine
```

```
{0ee2445c-a1c7-4cae-912c-0a6c73b3429c} service...
```

```
Jan 04 17:25:40 Node prctl[3037]: Login failed: Unable to connect to the server. The maximum  
number of simultaneous logon attempts has been reached. Try to connect to the server later.
```

```
Jan 04 17:25:40 Node systemd[1]: vz_0ee2445c-a1c7-4cae-912c-0a6c73b3429c.service: main  
process exited, code=exited, status=255/n/a
```

```
Jan 04 17:25:40 Node systemd[1]: Failed to start Virtual Machine
```

```
{0ee2445c-a1c7-4cae-912c-0a6c73b3429c} service.
```

```
Jan 04 17:25:40 Node systemd[1]: Unit vz_0ee2445c-a1c7-4cae-912c-0a6c73b3429c.service  
entered failed state.
```

```
Jan 04 17:25:40 Node systemd[1]: vz_0ee2445c-a1c7-4cae-912c-0a6c73b3429c.service failed.
```

I've tried to change VE_PARALLEL value in /etc/vz/vz.conf, also in /usr/libexec/vz, but it seems that this value is in taken in action only for containers.

Node information:

3.10.0-327.36.1.vz7.18.8

Does anyone have any solution for this issue?

P.S. I also tried to create an account in BugZilla, but got error: "A system error occurred while creating your user account."
