Subject: Re: openVZ7: how to set fs.file-max ?
Posted by khorenko on Wed, 08 Feb 2017 10:24:15 GMT

unlim,

this sysctl "fs.file-max" is not virtualized (it is global for the whole Node) so you cannot change it from inside a Container,
you can change it on the Hardware Node only.

The error "sysctl: setting key "fs.file-max": No such file or directory" is a bit strange to me,
i'd expect "sysctl: permission denied on key 'fs.file-max'",
but this is another story.
