A(r)dmin wrote on Mon, 06 February 2017 18:59 Also I would be interested (like williamt) in details of the private network restriction. Can someone explain or provide a link to the related documentation?

As I read in the documentation, it's only possible to add bridged interfaces to a VE. This is additionally to the host-routed network which is used by a VE by default. Is this the mentioned restriction?

No, this is not about iptables or bridged/host-routed networking, please see the feature description in Virtuozzo version 6:

[http://updates.virtuozzo.com/doc/pcs/en\\_us/virtuozzo/6/current/html/Virtuozzo\\_Users\\_Guide/33573.htm](http://updates.virtuozzo.com/doc/pcs/en_us/virtuozzo/6/current/html/Virtuozzo_Users_Guide/33573.htm)

Hope that helps.
