I shutdown the containers and made a backup:

```
# rsync -HSav /vz/private /vz/private_backup
```

Some time later I shutdown all containers again and restored a backup:

```
# rsync -HSav --delete /vz/private_backup/101 /vz/private/
```

When I start the container, I get this output:

```
...
 71: 880640.. 912689: 1734656.. 1766705: 32050: 1701888:
 72: 912690.. 915455: 1766706.. 1769471: 2766:
 73: 915456.. 923391: 1771520.. 1779455: 7936: 1769472: last,eof
/vz/private/101/root.hdd/root.hdd: 48 extents found
--- filefrag -vs finished ---
Adding delta dev=/dev/ploop25334 img=/vz/private/101/root.hdd/root.hdd (rw)
Mounting /dev/ploop25334p1 at /vz/root/101 fstype=ext4 data='balloon_ino=12,'
Container is mounted
Adding IP address(es): 10.1.0.101
Setting CPU units: 1000
Container start in progress...
```

What does this mean? Is this something to be worried about?
