Cool, I did not find that in my Google searching.

I have now done the following:

```
>rpm -q vzlinux-release
vzlinux-release-7-1.vl7.38.x86_64
>yum update vzlinux-release
Updated:
  vzlinux-release.x86_64 3:7-1.vl7.38.1
```

```
>yum update
Error: Package: 10:qemu-kvm-vz-2.9.0-16.3.vz7.6.x86_64 (factory)
       Requires: libspice-server.so.1(SPICE_SERVER_0.12.5)(64bit)
```

Then tried:

```
>yum clean all
>yum update
Error: Package: 10:qemu-kvm-vz-2.9.0-16.3.vz7.6.x86_64 (factory)
       Requires: libspice-server.so.1(SPICE_SERVER_0.12.5)(64bit)
```

Looks like I still am having the same problem.

```
>rpm -q vzlinux-release
vzlinux-release-7-1.vl7.38.1.x86_64
```

What have I missed?
