Subject: Problem disk on container
Posted by safranero on Thu, 22 Feb 2018 14:21:52 GMT

Hello,

I have a server with openvz with 15 containers. My vz partition:

total used free
881G 512G 325G 62% /var/lib/vz

I have a container with 600G disk but when I make a df shows:

Filesystem   Size Used Avail Use% Mounted on
/dev/simfs   485G 116G 325G 27% /
devtmpfs   8.0G   0 8.0G   0% /dev
tmpfs   8.0G   0 8.0G   0% /dev/shm
tmpfs   8.0G 496K 8.0G   1% /run
tmpfs   8.0G   0 8.0G   0% /sys/fs/cgroup
tmpfs   1.7G   0 1.7G   0% /run/user/0

Only 485G. I see that if I delete containers for free space of vz partition the disk ups. Can you make something to overselling?

A greeting.
