Hello,

Actually, I have mentioned all commands in the previous message
Just make sure the interface is in UP state on the HW

```
ip tunnel add tunel0 mode gre local 10.1.2.3 remote 10.2.3.4
ip link set up dev tunel0
vzctl set 100 --netdev_add tunel0 --save
```

I didn't try this now, but 11 years ago it worked, so I'm going to assume it still works.

Thank you.
