Factory repo is still enabled in [https://download.openvz.org/virtuozzo/releases/7.0/x86_64isos/openvz-iso-7.0.7-361.iso](https://download.openvz.org/virtuozzo/releases/7.0/x86_64/isos/openvz-iso-7.0.7-361.iso)
Be careful and disable the 'factory' repo!

yum-config-manager --disable factory
yum-config-manager --disable virtuozzolinux-openvz-factory
