Dear OpenVZ forum users,

as you probably noticed OpenVZ forum "lost" messages created between 18 Jul and 20 Sep 2018.

In pointed period of time forum was processed by clone of original container.

All submitted messages are not lost and I hope it will be restored and merged back into original container.
Unfortunately it's not easy task, and I did not found required functionality in FUDforum interfaces.

I'm sorry for this incident.

Thank you,
   Vasily Averin, OpenVZ maintenance
