Hi,

@ataraxis:

installing the gawk is another solution,
but it's better to modify the vzmigrate script
for using it with gawk and mawk :

so at line 378 :

```
grep "% of" | awk --assign ORS="\r" '{print $10}';
```

to:

```
grep "% of" | awk -v ORS="\r" '{print $10}'; then
```

That's all, you need not to install gawk

Regards,

Thorsten
