Hello Vasily, thanks a lot for your answer;

I already did an update of the vzctl environment ;

```
# uname -a  
Linux vpsh2.servidoraweb.net 3.10.0-862.20.2.vz7.73.25 #1 SMP Thu Dec 20 15:51:48 MSK  
2018 x86_64 x86_64 x86_64 GNU/Linux
```

```
# vzctl --version  
vzctl v.7.0.193-1.vz7
```

Anyway the problem remains there;

```
# vzpkg create cache ubuntu-16.04  
Creating OS template cache for ubuntu-16.04 template  
Error: Error: Got signal 11
```

Damn!
