
Subject: ploop-balloon discard for additional HDD

Hello all,

On OpenVZ 7, for a container, we added a extra HDD onto it.
(prlctl set "VPSId" --device-add hdd ...)

Now, can we run "ploop-balloon discard" online for a running container with extra HDD ?

```
[root@vpsXX harddisk1.hdd]# pwd  
/vz-ssd/private/81/harddisk1.hdd
```

```
[root@vpsXX harddisk1.hdd]# ploop-balloon discard DiskDescriptor.xml  
Error in get_dev_and_mnt (balloon.c:1270): Unable to find mount point for /dev/ploop28245
```

I tried /dev/ploop28245 , /dev/ploop28245p1 , but still failed.

It is possible to stop the container and run "ploop-balloon discard" successfully.
However, how to do it with running container instead?

Thank you for your advice.

Regards
George
