md5sum kpatch-kmod-151.14-0.5.0-4.vl7.x86_64.rpm

5cefc0c589e03293486a13dba4c8d0a6 kpatch-kmod-151.14-0.5.0-4.vl7.x86_64.rpm

Thank you very much. That seemed to work.

I have a few questions, if you dont mind and know the answer:

- * Why is the kpatch-kmod package not available for my kernel? is there some kind of issue on my end?

- * Is it supposed to be available for my kernel?

- * Finally, any way to test that the patch works other than wait for the issues to appear?

Thank you very much,
