noc.r wrote on Mon, 24 August 2020 14:11 Why is the kpatch-kmod package not available for my kernel? is there some kind of issue on my end?

No, this is expected.

kpatch-kmod packages are currently used for ReadyKernel only (<https://readykernel.com/faq>), which is available for Virtuozzo but not for OpenVZ. The packages are kept in a separate repository for that reason.

noc.r wrote on Mon, 24 August 2020 14:11 Is it supposed to be available for my kernel?

No, kpatch-kmod packages are not supposed to be available in OpenVZ. Still, we can provide these packages when needed for debugging, etc., like it was in this case.
