Subject: Unable to migrate container

Good day,

I'm running OpenVZ 7.0.22 (123) on both source & destination hosts. But when I try to migrate a container from one to the other, I get (from /var/log/prl.log):

03-13 11:05:00.494 W /sdk:948174:948178/ Connected directly
03-13 11:05:00.498 I /sdk:948174:948176/ Login response doesn't contain restriction event
03-13 11:05:03.317 I /IOCommunication:948174:948178/ IO client ctx [read thr] (sender 3): Stop in progress for read thread

I have been unable to find out how to fix this issue. I'm hoping you folks can help.

The container I'm wanting to migrate is running Plesk.
