Thank you very much for investigations. I noticed that I have forgotten to also send you the root password of server - it seems that you did solve the problem without it.

I'm looking forward to the new kernel - if I have time, perhaps I'll try to compile 050.1 on my own with ahci enabled meanwhile (if I do, I'll post my experiences in this thread).

Thanks a lot again for your great support!

have a nice weekend,

Werner
