```
# vzctl create 107 --ostemplate fedora-core-4-i386-minimal
Creating VPS private area: /vz/private/107
Unable to get full ostemplate name for fedora-core-4-i386-minimal
Performing postcreate actions
VPS private area was created
```

```
# vzyum 107 install yum
ERROR: No such OS template: install
```

```
# vzyum
Warning: Wrong number of parameters specified
Usage: vzyum <VPSID> <arguments>
       where <arguments> are yum arguments.
```
