Hi,

yes, you need a folder, where the quota-files are stored,
i doesn't really know where the g2 set the var-folder of "vzquota"

Please take a look in the vzquota-src:
If variable "VARDIR" is set to "/var", than vzquota-var-folder is "/var/vzquota".

or "strace vzquota show <veid> 2>&1 | grep open"

... on a debian host (as a example)

open("/etc/ld.so.preload", O_RDONLY)   = -1 ENOENT (No such file or directory)
open("/etc/ld.so.cache", O_RDONLY)   = 3
open("/lib/libc.so.6", O_RDONLY)   = 3
open("/var/lib/vzquota/quota.<veid>", O_RDWR|O_LARGEFILE) = 3

show's me, vzquota, opens a file in folder "/var/lib/vzquota" folder, reading the quota.<veid>
stats.file!
