It can be the case that you have not set up a separate partition for /vz, and the partition your VPSs are on have quota already turned on.

If this is the case, there are following options, choose one:

(1) create a separate partition for /vz;

(2) disable per-vps quota by setting DISK_QUOTA=no in /etc/sysconfig/vz (/etc/conf.d/vz for Gentoo)

(3) disable "native" quota for partition you use for VPSs.
