This is on ext3 :
serveur ~ # mount | grep /mnt/files
/dev/md/4 on /mnt/files type ext3 (rw)

But the openvz vm that works is on the same fs...

The only difference regarding the howto, is that I used a Stage3 2006.1 instead of 2006.0. This evening, I will retry with the 2006.0 stage3...

Regards,
