Subject: Re: Host: CentOS4, Guest: Debian, apt-get not working, strange problems
Posted by devnu11 on Thu, 22 Dec 2005 01:10:21 GMT

If you want to try a second template from this post enclosed below it only took me about 15 minutes to complete a working debian template. I am going to try and attach a file which is a debootstrap RPM. I downloaded the deb bootstrap and emerged a program into gentoo to transform the deb file into an RPM. It works great and I made a template for Debian 3.1 sarge using the installed RPM on a CentOS 4.2 host. Here is the forum post:

  http://forum.openvz.org/index.php?t=msg&th=80&start= 0

The attachment is the debootstrap RPM
