
Subject: [PATCH 4/13] BC: context inheriting and changing

Posted by [dev](#) on Tue, 05 Sep 2006 15:19:40 GMT

[View Forum Message](#) <> [Reply to Message](#)

Contains code responsible for setting BC on task,
it's inheriting and setting host context in interrupts.

Task references 2 beancounters:

1. exec_bc: current context. all resources are charged to this beancounter.
3. fork_bc: beancounter which is inherited by task's children on fork

Signed-off-by: Pavel Emelianov <xemul@sw.ru>
