Yes, I know I could have used a veth to do that. I was trying to avoid this solution because the docs mention some problems with that .. (and that it should also work with venet, veth is only a workaround )

Anyway, I have found:

```
vz# ip route add 10.0.0.0/24 dev venet0 src 10.0.0.108
```

Thanks for you help.
