You'll need a kernel  $\geq 2.6.16$  compiled with openvz patch (don't know if the distributed rpms have IPv6 enabled, you may have to compile the kernel).

For the configuration, you'll need to create a veth device. This link should help:

[http://wiki.openvz.org/Virtual\\_Ethernet\\_device#Virtual\\_ether net\\_device\\_with\\_IPv6](http://wiki.openvz.org/Virtual_Ethernet_device#Virtual_ether_net_device_with_IPv6)

HTH
