Subject: *SOLVED* yum for VE
Posted by victorskl on Sun, 10 Sep 2006 16:39:38 GMT

Hello all,

I cant yum from VE(as root). Is there anything that i have to set specific config? I've installed openvz on centos and then created several centos VEs. I can only vzyum from HN. When i attempt from VE yum, it show:

Quote:
ERROR: Cannot find a valid baseurl for repo:update

Thanks a lot..
