Hi,

I want to use OpenVZ with Gentoo. I did the install of OpenVZ as described in

<http://dev.croup.de/proj/gentoo-vps/wiki>

When I try to enter, I get:

```
gs ~ # vzctl start 2001
Starting VPS ...
VPS is mounted
Setting CPU units: 1000
VPS start in progress...
gs ~ # vzctl status 2001
VPSID 2001 exist mounted running
gs ~ # vzctl enter 2001
Unable to open pty: No such file or directory
enter failed
gs ~ #
```

and

```
gs ~ # vzctl exec 2001 ps aux
Error, do this: mount -t proc proc /proc
gs ~ # vzctl exec 2001 mount -t proc none /proc
gs ~ # vzctl exec 2001 ps aux
USER      PID %CPU %MEM  VSZ  RSS TTY   STAT START  TIME COMMAND
root       1  0.0  0.1 1368  480 ?     Ss   00:30  0:00 ini
root    22894  0.0  0.3 2372  832 ?     Rs   00:31  0:00 ps aux
gs ~ #
```

Any hints?
