Subject: communication slow between vps
Posted by webmba on Mon, 18 Sep 2006 09:57:24 GMT

I am running whith 2.6.9-023stab016.2 in centos 4.4 for the HN
i have configured 3 vps.
1 - debian 3.1 with apache2 and php4 ip:192.168.0.200
2 - fedora core 4 with mysql-server ip: 192.168.0.201
3 - debian 3.1 with lighttpd (proxy-web) ip: 192.168.0.252

the ip of HN is : 192.168.0.253

the communication between the vps are very slow, for mysql request for exemple or simply to connect ssh between HN and vps.
please help me!

Excuse-me for my english, but im french.
