Hi,

I use virtuozzo in my day job and openvz is very much the same. Just no windows GUI which I hate using anyway!

virtuozzo and openvz are wonderful - I don't know why more people aren't using them. I hear a lot of hype for xen and usermode but virtuozzo/openvz is so great for many common needs.

I'm very happy to be using openvz - very good for my side projects that I can't afford real virtuozzo for.
