The problem is that this driver is compiled in OpenVZ kernel. mkinitrd doesn't find module and complains on it...

Can you tell me distribution you use, please?

At the moment you can create initrd manually specifying

--builtin=builtin=module.

However this seems to be bug in mkinitrd and i'm waiting for your answer about distribution.

As concerns compiling from src. I'll check it tomorrow.

HTH,

vass.
