Subject: Re: Gentoo Template Woes
Posted by Vasily Tarasov on Fri, 22 Sep 2006 10:53:46 GMT

During discussion via ICQ we've solved this problem.

Script /etc/init.d/checkroot in VE should contain:

```
depend()
{
echo
}
start()
{
echo
}
end()
{
echo
}
```

and not the stuff that is at
http://wiki.openvz.org/Gentoo_template_creation.

I suspect that Inverted has used 2006.1 version,
where runscript programm is changed a bit. Wiki article should be updated.
