Subject: Re: NFS problems [SOLVED:unfs3]
Posted by mike on Fri, 22 Sep 2006 14:43:17 GMT

ACK, unfs3 Just Works (TM). Had to figure out that LTSP did put the directory it was lazy to create into /etc/exports (and unfsd refused to export anything while complaining loudly in a log); after fixing that up, things went bright. Well, there was another patch needed to fix LTSP's terminal image startx script, but that's their lapse at sanitizing input...

Thanks for the tip.
