Subject: *SOLVED* changing ostemplate on the fly
Posted by victorskl on Sun, 24 Sep 2006 13:09:07 GMT

Dear all,

can we change ostemplate on the fly?
let's say VPS101 created with centos-minimal, then wanted to change to fedora-core-4, can we just simple do,

#vzctl set 101 --ostemplate fedora-core-4

or any other way??

Thanks,
