Subject: Re: Fastest/most efficient method to get list of PIDs for VE
Posted by dlzinc on Sun, 24 Sep 2006 19:05:22 GMT

List all processes and which VE they live in

ps -A | awk '{print $1}' | xargs vzpid

Or... list all processes in a VE (assuming they have a good, working "ps")

vzctl exec VEID ps -A

Or... (there's probably a better way?)

ps -A | awk '{print $1}' | xargs vzpid | egrep "[[:space:]]VEID[[:space:]]"
