Subject: Re: cPanel Quotas Posted by gral on Mon, 25 Sep 2006 15:25:41 GMT View Forum Message <> Reply to Message

Fix it!

Heres what I do, there may be a more elegant solution, but its free:

rm -rf /aquota.user 2>/dev/null rm -rf /aquota.group 2>/dev/null unlink /aquota.user 2>/dev/null unlink /aquota.group 2>/dev/null for x in `find /proc/vz/vzaquota/ | tail -1 | xargs find | tail -2 `; do In -s \$x /; done

OpenVZ Forum

But why do it this, the WHM take the correct quota??, and this fix my repquota -a too, because before that the repquota show the hard and the soft limit in 0 and now the limits are correct!

Thanks
