Subject: Re: Clock Drift / NTPd - CentOS OpenVZ Host - Problems
Posted by tchipman on Tue, 26 Sep 2006 12:16:46 GMT

Hi,

You are right -- I'll probably have to try this for a little while. I'm not keen because it means killing my vzhosts for an hour or so, and I've got semi-production services inside some of them now. Suppose I could migrate the vzhosts temporarily for the test period to my backup-test-vzhostbox. Whoo hoo. Fun never ends.

I'll post the results once I've finished the test.

T
