It's working, tks

PID	USER	PR	NI	VIRT	RES	SHR	S	%CPU	%MEM	TIME+	COMMAND
26709	root	25	0	1936	960	284	R	10.6	0.0	0:07.00	cpuburn-in
26708	root	25	0	1936	960	284	R	10.2	0.0	0:07.04	cpuburn-in

But since i've limited it to 19% (392Mhz) shouldn't i get something like:

```
processor      : 1
vendor_id     : GenuineIntel
cpu family    : 15
model         : 6
model name    : Intel(R) Pentium(R) D CPU 2.80GHz
stepping      : 4
cpu MHz       : 532
```

```
Instead of
processor      : 1
vendor_id     : GenuineIntel
cpu family    : 15
model         : 6
model name    : Intel(R) Pentium(R) D CPU 2.80GHz
stepping      : 4
cpu MHz       : 2815.033
```

Regards,
