Quote:The held and failcnt has increased since I have run it a couple of times since, however nothing else has changed, no limits or barriers appear to have been reached, even though the failcnt has increased.

You should set barrier/limit so high, that no failcounters will appear! Just try to increase barrier/limit to extremely big value, run java, than mark maxheld. And set barrier/limit for example to (maxheld + 0.25 * maxheld).
