Subject: Re: Firewall rule don't allow ftp while port 21 is open Posted by whatever on Fri, 06 Oct 2006 07:43:07 GMT View Forum Message <> Reply to Message

After # that too it don't work. Problem is when we connect VPS it stops after connection goes to passive mode. When I stop the firewall it works. Can you test on your server and let me know. I am running pureftpd Thanks
